

CUTTING STATION

Count and cut the correct number of coordinating squares (twelve 21" or forty-eight 11") and pass them along to the design station all at one time.

DESIGN STATION

Lay out the pattern for the top of the Quilt. Using 21" squares, lay out a pattern of 3 across by 4 down. Using 11" squares, lay out a pattern of 6 across by 8 down. Pin the rows together and mark (row 1, row 2, row 3, etc.) with sticky notes. Pin the notes to the appropriate rows, and pass one completed top at a time to the sewing station.

SEWING STATION 1

Sew squares into rows in the order passed on from the design table. Use a $\frac{1}{2}$ " seam allowance. Once the rows are complete, sew the rows together in the correct order (row 1 to row 2, row 2 to row 3, etc.).

TYING STATION 1

Place the 64" x 84" back piece on the table with the right (usually brighter) side against the table. Place the 60" x 80" filler centered on top. Place the completed top over the filler. Secure with pins, or use masking tape to tape the layers to the table to keep them from moving. Using the needles and crochet thread, tie through all three layers of the Quilt at 8-10" intervals. For 11" squares, it works perfectly to place one tie in the center of each square, or at each corner. For 21" squares, it helps to measure and mark a grid with pins at the places where each tie should be.

TYING STATION 2

The edge of the back will extend about 2" on all sides of the Quilt. Once the tying is complete, fold the edge in 1", in toward the top. Fold it again, so that the folded edge completely covers the raw edges of the top and filler, and pin in place. At the corners, fold one edge over the other; if you'd like, you can fold the outside corner under to miter the corner. Pass the pinned Quilt back to the sewing station.

SEWING STATION 2

Using a zig-zag stitch, sew right along the folded edge on top of the Quilt, catching some of the folded edge and some of the Quilt top, to secure it. Make sure to sew along the entire exposed fold at each corner, too.
