

Resilience Plus: Promoting Recovery and Reducing Vulnerability

RESULTS

- More than 1,245 men and women have participated in **soil and water conservation activities through cash-for-work (CFW)**, helping over 9,189 people meet their immediate needs, while also contributing to **disaster risk reduction efforts**.
- More than 1,100 women have participated in **animal fattening or small animal restocking (habbanayé)** activities, facilitating their families' resilient recovery from crisis.
- 76 local, project-trained volunteers have shared their knowledge of improved **livestock rearing** with 352 people. In total, 660 people will receive technical support on improved animal production from these volunteers.
- 353 people have been trained in **improved agricultural production and storage techniques** by 18 local, project-trained volunteers to boost harvest productivity.
- More than 593 members of LWR's local community based organization (CBO) partners have benefitted from organizational governance and leadership training that is helping CBOs **enhance accountability**.

FROM RECOVERY TO RESILIENCE

- Resilience Plus is **enhancing communities' resilience** by strengthening local organizational structures, increasing crop diversification, improving access to credit and inputs, and establishing networks with external stakeholders.
- Resilience Plus is promoting **environmental sustainability** through soil and water conservation activities, and advancing **organizational sustainability** by strengthening the capacity of existing CBOs. Project beneficiaries' increased access to credit and expanded participation in the agricultural value chain will also promote **economic sustainability**.
- LWR's monitoring and evaluation framework allows for **continuous learning** and adaptation to ensure projects continue to achieve strong results while effectively responding to changing needs within target communities.
- Resilience Plus coordinated a **regional learning event** for CBO partners focused on best practices in facilitating resilient agro-pastoral livelihoods and organizational and financial management. A second, mid-term learning event is planned for 2015.

QUICK FACTS

Lutheran World Relief is reaching more than 100,000 crisis-affected people in Burkina Faso, Mali and Niger by:

- Diversifying, increasing and protecting crop and animal production for the poorest households.
- Increasing households' sales margins and incomes from agriculture.
- Building the capacity of partner community-based organizations (CBO) and their leadership.

LWR has worked in West Africa since the 1970s. LWR's programming model increases community resilience to future shocks by providing cash-for-work programs that meet immediate needs while investing in long-term solutions; improving agriculture production and natural resource management; and inspiring behavior change in household nutrition.

The Resilience Plus program portfolio is supported by the Margaret A. Cargill Foundation, the Bill & Melinda Gates Foundation, USAID's Office of U.S. Foreign Disaster Assistance (OFDA), and the Food and Agriculture Organization of the United Nations (FAO).

LOCAL PARTNERS: Union Hadin Kai (Niger), Union Tamani (Mali),

Fédération des Diéma Tin Tua (Burkina Faso)

PROJECT PERIOD: October 2013 – January 2016

FUNDING: \$1,500,000 (Margaret A. Cargill Foundation)
